

Everything you need to know. Every company in the WCSB. **Instantly.**

AssetBook

Stay nimble with **AssetBook**

AssetBook is the ultimate industry intelligence source for Canadian E&P companies and anyone who does business with them. Think of it as a powerful search engine and data source for the western Canadian oil and gas industry with instant access to everything you need to know about every company and area in the WCSB.

AssetBook serves up the best detailed listing of working interest production, historical production, reserves, land-holdings, facilities, and pipelines broken down by either company or area. AssetBook's simple, intuitive interface makes it easy to search, filter, sort, and analyze useful data to support better decision-making across the entire E&P business cycle.

The screenshot displays the AssetBook web interface. At the top, there are navigation tabs for 'Area and Ownership', 'Reports', and 'PoolBook'. A search panel on the left allows filtering by 'Area' and 'Company'. Below the search bar, there are tabs for 'Asset Summaries', 'Financial Summaries', and 'News'. The main content area shows a table of company summaries with columns for Company, Stock Symbol, Subsidiaries, BOE (bbl/d), Sour Gas (mmct/d), Sour Gas Avg H2S (%), Oil Under 20 API (bbl/d), Oil Gravity Under 20 API (°API), Oil Over 20 API (bbl/d), Oil Gravity Over 20 API (°API), Oil (% of Total Boe), Gas (% of Total Boe), and Gas (mmct/d). Below the table, there are three charts: a production bar chart, a land map, and a drilling history line chart. The production bar chart shows production for various companies, with Encana Corporation at the top. The land map shows land holdings in the WCSB. The drilling history line chart shows drilling activity from January 2017 to January 2018.

AssetBook's company search is a quick, easy way to analyze pertinent details about any company in the WCSB. An AssetBook subscription provides everyone in your company with the vital industry data they need, grouped and displayed for effective planning and decision making.

More effective decisions. Less overhead.

AssetBook's web-based interface requires zero IT implementation and lets you work from anywhere. One subscription provides unlimited access for everyone in your organization.

AssetBook for E&Ps

AssetBook's user friendly web-based tools help E&Ps save money by uncovering unadvertised assets that lead to mutual benefit for both buyer and seller. Enhanced filtering and access to full data resources allows smaller teams to work more productively while increasing clarity and reducing uncertainty for a wide range of transactions.

- Perform industry and competitor research and corporate benchmarking quickly, easily, and more effectively than with mapping and other tools.
- Simplify strategic decision-making by building and comparing multiple growth/merger scenarios in a fraction of the time it would take with any other method.
- Analyze potential corporate acquisitions or divestitures with greater certainty. With just a few clicks, filter through thousands of public and private companies to find the ones that meet your specific criteria.
- Merge companies to assess their compatibility or to find fall-out properties.
- Identify unadvertised best-fit properties that are non-core to a potential seller, instead of waiting until the assets hit the market for everyone to bid on.

Alt-click and drag to draw a bounding box for your search.

Whether you're researching competitors or looking for growth opportunities, AssetBook's straightforward design and powerful filtering tools make it easy to find the information you need to plan your business strategy.

AssetBook for Finance, Audit, & Banking

AssetBook is the fastest way to find the best deals and best-fit opportunities for your clients.

AssetBook is a vital tool for any professional who works in oil and gas finance, audit, or investment banking. It is a single, reliable source of information on the assets, operations, financial performance, and liability positions of every company in the WCSB.

- Serve your clients better by gaining insight and understanding into their businesses.
- Analyze opportunities for ROI and best fit with your clients' growth plans.
- Drastically reduce the time required to perform due diligence on deals.
- Find and counsel your clients on best-fit A&D opportunities.

Enhance the power of AssetBook even more

The AssetSuite provides several extremely useful, purpose-built add-on modules to help you manage and grow your business faster and with greater focus.

AssetBook ARO

Estimate and monitor costs associated with abandonment and reclamation.

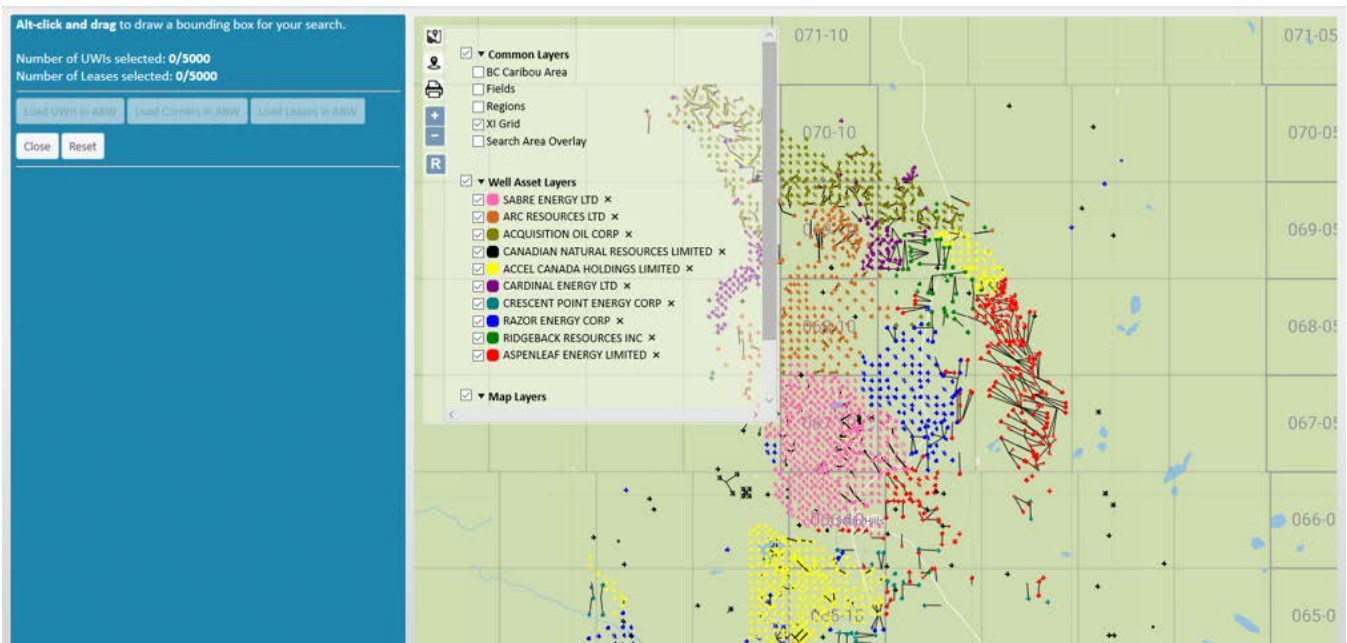

AssetBook LLR

Assess risk by easily calculating LLR down to a well level for any WCSB company.

AssetBook for Service & Supply Companies

AssetBook is a rich and valuable source of market information that helps service and supply companies find their ideal clients and grow their business.

- Quickly and easily research and prioritize potential customers based on a wide range of factors.
- Prepare for sales calls and meetings with a full understanding of your clients' business operations.
- Know your prospects' core areas and be able to position yourself as a pack leader.
- Find synergies between your existing clients and their partners and identify new prospects where you have an "in".
- Monitor land and production activity that can lead to new business.

Your next new client could be just a few clicks away! AssetBook is the most effective way to find all the operators in an area, as well as their partners, helping you to focus your sales efforts on the most likely prospects.

AssetBook Pro

Visualize data to spot trends, identify best fits, and create executive reports.

AssetBook Graphs

Easily visualize historical and forecasted production and land data.

AssetBook Pools

Search by pool characteristics and performance.

AssetBook Historical

Look back through previous releases of AssetBook to see snapshots in time of a company or area.

Data Driven. Solution Focused.

XI Technologies Inc. has been a trusted partner to the Canadian oil & gas industry since 2004.

We leverage data and online technology to provide Canadian oil and gas clients with mission-critical research and analysis tools that smooth their workflows and drive productivity. With XI's unique, data-driven solutions, energy and energy service companies can make more informed decisions and achieve maximum ROI from competitive analysis, A&D scoping, asset planning, business development, drilling, operations, regulatory compliance and risk management.

AssetBook provides asset analysis and planning tools for oil and gas professionals working in:
