

H2S Complete

H2S Release Rate Assessment

Analysis and Preparation for Compliant (Dir56) Well Licensing

XI Technologies' H2S Reports is the industry's foremost H2S research tool. This web-based application delivers everything you need to assess the potential release rate for a prospective drilling site. For regulatory compliance, it is a critical tool to evaluate and calculate the information, but remember you are not finished yet.

An essential component will always remain: expert, professional analysis, that a qualified analyst apply the information to the well in question, in order to produce an H2S assessment.

When resources are scarce, experience is limited, and deadlines are imminent, our clients are looking for cost effective solutions.

Introducing XI's new H2S Complete service: Expert analysis and documentation of your H2S release rate assessment for compliant well licensing (AER Directive 56)

- ✓ Fast results - Reports delivered in under one week
- ✓ Low cost - Spend hundreds, not thousands on data analysis
- ✓ Expert analysts - Professionals with years of regulatory experience doing the work.
- ✓ Delegated tasks - Let your engineers be engineers, not data hunters
- ✓ Improved due diligence - Individual assessments per location (preferred by the AER) without added cost or redundancy

There is no need to make the choice between due diligence and cost efficiency. Hand the task of H2S release rate calculations to us. We provide a faster turn around, save you money and improve your regulatory compliance.

You'll receive your H2S release rate assessment quickly, and performed by qualified by professionals with years of specialized experience. If you're already outsourcing this work, pay only for what you need.

Fast results. Low Cost. Expert Analysis. Improve due diligence.
The biggest risk is doing nothing.

Other Available Regulatory Applications:

H2S Reports

H2S Reports is the foremost H2S Research application in the industry and allows you to quickly assess a prospective drilling site for H2S release rate potential.

Surface Casing

Integral to a comprehensive drilling program, the Surface Casing Report (now on the web) provides the minimum surface casing depth required to satisfy the AERs Directive 008.

Drill Problems

Drill Problems Report is a fast, easy way to survey a particular area for known problems that have occurred. This report offers critical information on, Loss Circulations, Kicks, Blows/Blow Outs and Water flows.

FAQ's

Who will perform the analysis

XI has partnered with a diverse group of drilling professionals and analysts, ranging from AER auditors, Regulatory Experts, professional Drilling Engineers & Geologists.

What is the Scope?

H2SComplete is the combination of reliable information and analytical interpretation to qualify results. The result is a report that will allow you to make final decisions and prepare for well license application. It cannot replace the requirement for an Operators' sign-off, which involves both engineering and geology.

What if I don't have the engineering/geology available in house?

Several of our partner analysts are available on a consulting basis to take your project to a more comprehensive level. We will coordinate a solution between our partners and clients, no matter what the needs are.

What is the time frame to complete a project?

Depending on complexity of the well and its location, an H2S Complete report could be delivered within 4-7 business days. We also provide 'rush orders' (for an additional cost), which can be completed in 2-4 business days.

Do I own the work once complete?

We provide all documentation and source material to our clients. The H2S Report itself is ordered under the client's account, making it easy to access the search and review our analysts comments and changes.

How do I get started?

To receive a more exact estimate of time and cost, clients will complete a simple request form detailing the specifics of the well.

- ✓ Attention to detail
Without the Resource Strain
- ✓ Compliance
Without the overhead
- ✓ Completed Tasks
Without the Distraction
- ✓ Outsourcing
Without outrageous costs
- ✓ Extend your investment
With Insight
