AssetBook LCA (LLR)

The first step in managing **liabilities & risk**

Fast, accurate liability insight for every transaction

AssetBook LCA (LLR) is a specialized liability and asset health assessment module built for oil and gas companies operating in Western Canada. It delivers fast, regulator-aligned insight into corporate liability exposure and asset strength, supporting ***informed A&D decisions, risk management, compliance, and closure planning*** under Directive 088. Companies gain a forward-looking view of how regulators and partners will assess operational and financial health.

With its new **Post-Transaction Scorecard** you get a clear view of how asset transactions reshape liability and portfolio strength. Generated directly from your well asset search, it enables immediate evaluation of buyer and seller projections based on real transaction scenarios.

With a simple selection of the buying company, the system produces a complete post-transaction analysis using your defined asset set. Stakeholders can review pre and post-transaction tiers, compare asset counts across categories, and understand how acquisitions or divestitures affect overall liability exposure.

Focused visibility into key metrics such as total well abandonment spend supports precise evaluation and stronger decision-making. The result is a transparent, auditable, and regulator-aligned view of both current and future liability position, essential in a landscape defined by rising closure requirements, tighter license transfer rules, and increased scrutiny from regulators, stakeholders, and investors.

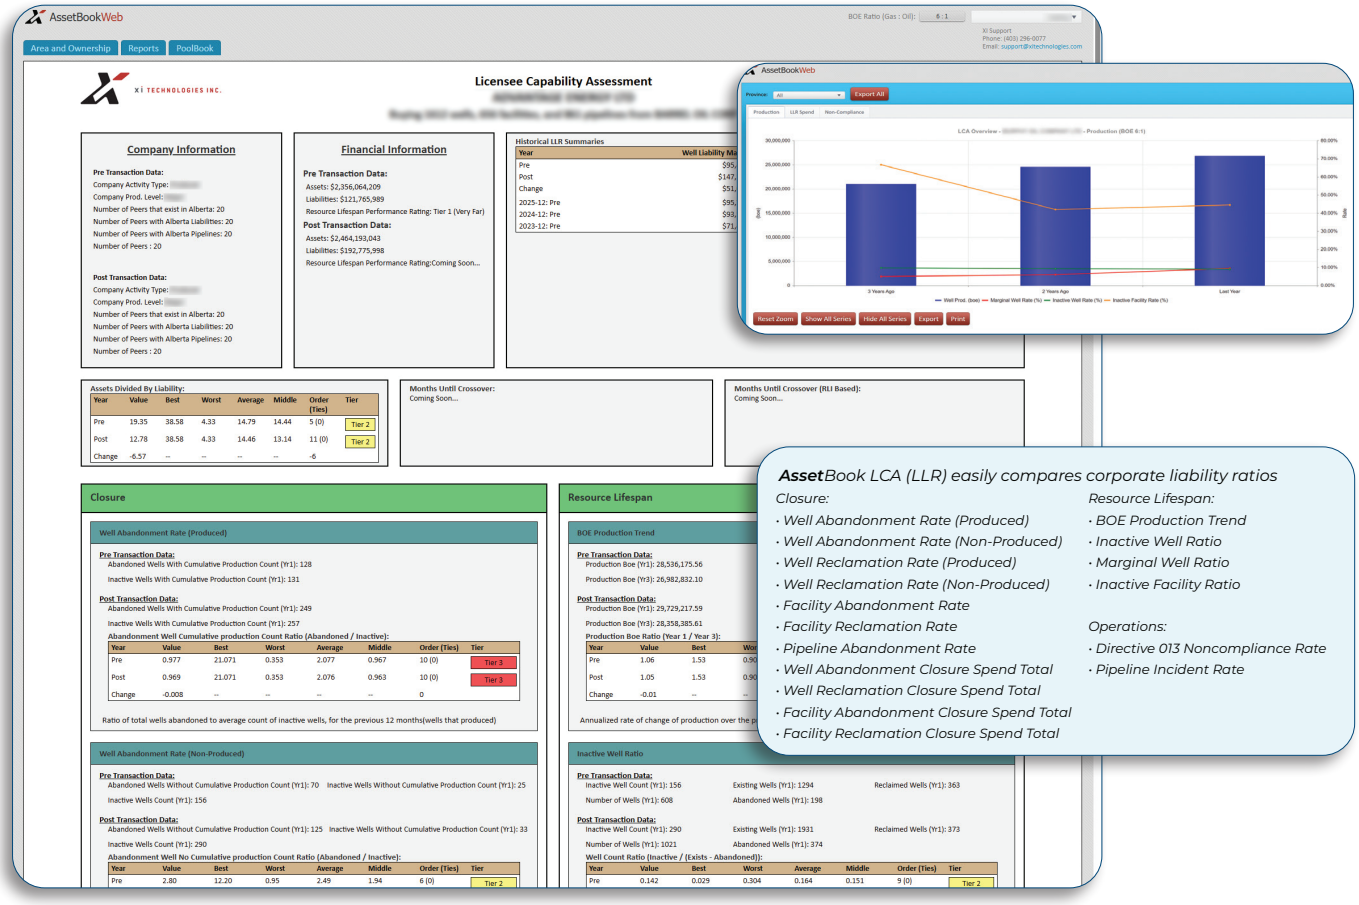
AssetBook is the ultimate industry intelligence source for Canadian E&P companies and anyone who does business with them. It gives you instant access to everything you need to know about every company in the WCSB and is an integral tool for strategic decision making.

Don’t Guess - Know Your Liabilities

AssetBook LCA (LLR) was developed to cut through the complexity of liability assessments by offering a focused, real-time view of liabilities across individual assets or entire portfolios. Built with input from industry professionals and aligned with key regulatory frameworks including AER’s Directive 088, Manual 023, and select elements of BC’s Closure Activities Program. **Asset**Book LCA (LLR) is designed to make massive volumes of liability-related data more accessible, actionable, and understandable.

In the high-stakes world of acquisitions and divestitures, **Asset**Book LCA (LLR) helps users evaluate two key questions: “***Is this deal financially intelligent in light of the liabilities?”*** And ***“Am I likely able to transfer these assets?”***

But its value doesn’t stop there. **Asset**Book LCA (LLR) also supports peer comparisons, peer reviews, and data gathering for internal KPIs, giving you the tools to benchmark performance, monitor trends, and support strategic planning.



A tool made for professionals working in:

- Business Development
- Mergers
- Finance
- Environmental/Liability Management
- A&D
- Land
- Operations
- Legal Council
